PORTFOLIO

ABOUT ME

I'm a Senior Frontend Developer at TechleadNext, building the company's core enterprise portal with React, TypeScript, and a token-driven design system. Over 8 years I've shipped production software across the stack — Svelte/SvelteKit and React frontends, Node.js backends (Express, Fastify, NestJS, Prisma), and mobile apps in Flutter and Swift for banking, telecom, and enterprise clients.

My background includes leading the development of a cross-platform banking app (Customer 360 for TTB), maintaining a shared design system with Storybook, and setting up CI/CD pipelines from Jenkins and GitLab CI to GitHub Actions. I develop AI-first: AI coding agents (Claude Code) with my own hooks and skills are my daily working environment, and I ship LLM-powered product features through the Anthropic API.

WORK EXPERIENCE

TechleadNext Apr 2026 - Present

Portal 2.0 (Enterprise Portal Platform)

SENIOR FRONTEND DEVELOPER

Senior Frontend Developer for the company's core enterprise platform. Build the web frontend with React and TypeScript on a token-driven design system (Tailwind CSS v4), keeping code and Figma in sync through documented components, patterns, and drift-check workflows. Also contribute to the Node.js backend services (Express-style architecture with Prisma and PostgreSQL) covering RBAC, notifications, media, and scheduled jobs. Day-to-day development is AI-agent-assisted (Claude Code) — spec-driven tasks, automated PR review, and CI.

React | TypeScript | Tailwind CSS v4 | Node.js | Prisma | PostgreSQL | Vitest

Design System & Component Library (Portal 2.0)

SENIOR FRONTEND DEVELOPER

Build and maintain the shared design system behind Portal 2.0: coded React + Tailwind components with per-project theming, a Storybook catalogue of every component's variants and states, and a token architecture (foundations + semantic tokens) mirroring the Figma source of truth. Set up automated npm publishing to GitHub Packages with release-tag verification via GitHub Actions CI.

React | Tailwind CSS | Storybook | Design Tokens | GitHub Actions | GitHub Packages

AI Agent & Developer Tooling

FULL STACK

Develop AI-powered internal tooling: an AI agent for portal workflows (shell-based automation) and LLM integrations using the Anthropic API, including an automated GitHub PR reviewer. Focused on practical developer-experience gains — code review, workflow automation, and integration testing.

Anthropic API (LLM) | Shell | GitHub Actions | TypeScript

Mali Meeting (AI Meeting Assistant)

FULL STACK

Built the Mali Meeting product line — AI meeting assistants for Thai teams. The core is a browser side-panel that captures meeting audio and streams live Thai captions in real time, then auto-drafts meeting summaries and files action items to Jira/Notion/GitHub. Related components include an AI bot that joins online meetings and responds with voice, and a desktop app for Thai transcription with automatic speaker separation.

ODT May 2022 - Mar 2026

TTB Project, Retail Lending Team, Common Apply Team, Tep Team

FRONTEND

• Retail Lending Team: Developed Web Applications (Loan, Credit Card) with React. • Common Apply Team: Developed Native iOS apps (NTB - New To Bank) with Swift. • Tep Team: Led the development of a Cross-Platform internal application (Customer 360) using Flutter for TTB Bank's Call Center and Branch employees, implementing complex enterprise features including 360-degree Customer Profiles, Product Holdings (Assets & Liabilities), Touchpoint & Case History, Customer Suitability & Insights, RBAC Permissions, CRM Integration, and Personalized Messaging to enhance customer service capabilities.

React | Swift (IOS) | Flutter

a-chieve social enterprise

FULL STACK

Developed comprehensive platforms for the social enterprise, including: • Student Web Application: A platform for students and interested users to discover career paths and access guidance tools. • 'To School' Web Application: A dedicated portal enabling teachers to monitor, track, and support students under their care. • Admin CMS: A Content Management System for administrators to update system details, articles, and platform content. • Reporting System: Automated data reporting dashboards tailored for both teachers and administrators.

Vuejs | NuxtJs | Golang | NodeJS | PostgreSQL | Redis | Kubernetes

KhunaiStory (Personal Project)

FULL STACK

Developed an English learning application (app.khunaistory.com) through engaging stories. Features include AI-powered role-playing with avatars, interactive story reading, and flashcards for vocabulary practice (Oxford 3000). Built with a focus on immersive user experience and educational technology.

SvelteKit | Supabase | AI (LLM) | Tailwind CSS

Storage and Cookies Manager (Chrome Extension)

FRONTEND

Developed and published a popular open-source Google Chrome Extension (https://chromewebstore.google.com/detail/storage-and-cookies-manag/oohieppjjpdgidfhdlcjfpfmhkpflbcc) designed for web developers. Currently serving 1,000+ active users. Features include viewing, editing, adding, and deleting Cookies, LocalStorage, and SessionStorage in real-time. Built with Svelte and HTML/CSS, focusing on a clean, intuitive UI and strict adherence to Chrome's Manifest V3 security policies.

Svelte | Manifest V3

PCW Cleaning Assessment (Free WebApp)

FULL STACK

Developed a free web application (https://cleaning.pcw.ac.th/) for PCW school. The platform enables student committees to perform daily classroom cleanliness assessments and record scores. It features a comprehensive reporting system that allows homeroom teachers, students, and staff to monitor and review the cleanliness evaluations.

Nuxt | Vue | Tailwind CSS

Hi-Q Food Products Co., Ltd. Oct 2019 – May 2022

Internal and Public Application

SENIOR PROGRAMMER & TECHNICAL LEAD

Team management with Agile and daily meetups with Scrum. Development of authorization systems using sessions, cookies, and JWT. Development of SSR applications using SvelteKit and database with PostgreSQL, Prisma ORM. Implementation of authorization systems using Session Cookie Authentication, JWT Authentication, and Keycloak. On-premises infrastructure setup network configuration. Use Proxmox to Manage Instant of VM. Project deployment management using Docker Nginx. Some Projects Deployment on Kubernetes. Build and deploy automation using Jenkins or GitLab CI. Reverse proxy implementation using Nginx Proxy Manager and Manage DNS with PowerDNS.

- Felina Canino Application: Developed by Svelte Frontend Framework use NestJS to Develop Backend, integrating with Navision API and storage data with MongoDB and MS SQL.
- Line Official Account (Point Reward System): Full-stack development using Svelte Implement with Line Liff Framework.
- HR Management Platform: Built an Express backend with MongoDB via Strapi V2.
- Mobile Survey Application: Created a Flutter-based solution with Firebase integration.
- Jobber Application: Optimized backend with Fastify using dual database architecture.

SvelteKit | NestJS | PostgreSQL | Prisma | MongoDB | Docker | Nginx | Kubernetes | Jenkins | GitLab CI | Keycloak | Proxmox

Saraff Infotech Co., Ltd (site AIS) Jul 2018 - Oct 2019

AIS Kiosk & E-Service Web Application

FRONTEND

Developed comprehensive self-service Web Applications deployed on interactive Kiosks across AIS (https://www.ais.th/) branches nationwide. Spearheaded the frontend development for core telecommunication services including the 'New Device Purchase' flow (integrating with inventory and payment gateways), the 'Mobile Number Portability' (Switch to AIS) journey, and extensive account management systems for both Prepaid and Postpaid customers. Built secure, high-performance API services to bridge the frontend with core legacy backend systems, ensuring a seamless omnichannel customer experience.

Angular 6 | Redux | Bootstrap 4 | HapiJS | NodeJS

Nextwaver.NET Jan 2018 - Apr 2018

AIS Project

FRONTEND

Develop web application PHR Profile, Develop Text recognition for Save profile in the book Profile, Develop Deep learning for Training software, Manage Data using .Net Core

PHR | Python | C# .Net Core

TECHNICAL EXPERTISE

Category	Technical Expertise
AI & LLM	AI-assisted development (Claude Code), Agentic workflows (hooks, skills, subagents), Anthropic API (Claude), OpenAI Realtime API (STT), Thai ASR & speaker diarization (Typhoon)
Programming Languages	JavaScript, TypeScript, Python, Go, Java, C#, Swift, Kotlin, Dart
Frontend	HTML/CSS, Tailwind CSS, React, Svelte, Vue, NuxtJs, Angular
Backend	Node.js, Express, Fastify, NestJS, Prisma, Go-gin, .NET Core
Database	MongoDB, Firebase, PostgreSQL, SQLite, MySQL
DevOps	Docker, Kubernetes, Jenkins, GitLab CI, GitHub Actions, Nginx, Cloudflare

EDUCATION

Degree	Institution
B.S. Computer Science	UDON THANI RAJABHAT UNIVERSITY
